Village Walk Open

Murrieta—Village Walk Plaza, the City of Murrieta's new retail power center, is setting the bar for retailers in Southwest Riverside County.

With four-sided architecture and major I-15 freeway frontage, Village Walk is attracting customers from around the county. All but one of the major stores opened in time for the Christmas shopping season. Destination retailers such as Guitar Center, Sports Authority, Levitz Furniture, Bed Bath & Beyond, and more did a brisk holiday business.

"In talking to some of the shoppers, we found that they had a very positive experience at Village Walk," said Steven J. Felderman, President of Arthur Pearlman Corporation. "The fact that it's all new is a big plus. But the bottom line is we have stores people like and they are heavily stocked with bargains. We look forward to completing all the improvements early next year and making the shopping experience at Village Walk even better."

Village Walk was conceived and developed by Rancon and the Arthur Pearlman Corporation. It's a benchmark shopping center that features enhanced facades, a variety of landscaping motifs, and a list of major national retailers. At 320,000 square-feet, Village Walk Plaza is the largest retail power center in Southwest Riverside County.

"Village Walk Plaza is another great project completed by Arthur Pearlman Corporation," says Dan Stephenson, founder and CEO of Rancon. "It sets the bar for our future projects and we look forward to creating great shopping opportunities for the residents of Southwest Riverside County."

When fully completed, Village Walk Plaza will feature approximately 310,000 square feet of retail space, 10,000 square feet of restaurant space and about 1,400 parking spaces.
